

Bulk Email Sender using Google Apps Script

Quick Setup Guide

This guide helps users set up and run the Bulk Email Sender project without needing GitHub experience.

Step 1 – Open Google Apps Script

Go to <https://script.google.com> and sign in with your Google account.

Step 2 – Create a New Project

Click 'New Project' and delete the default Code.gs content.

Step 3 – Copy the Script

```
/*
=====
Bulk Email Sender using Google Apps Script
=====

DESCRIPTION
-----
This script sends personalized HTML emails with a PDF
attachment to multiple recipients.

HOW TO USE
-----
1. Upload your PDF (Resume, Brochure, etc.) to Google Drive.
2. Copy the Google Drive File ID.
3. Replace YOUR_GOOGLE_DRIVE_FILE_ID below.
4. Update the recipient list.
5. Customize the email subject and email body.
6. Click Run.

=====
*/

function sendPersonalizedEmailsWithAttachment() {

  // =====
  // STEP 1: Add Recipients
  // =====
  // Replace these sample contacts with your own.

  const contacts = [
    { name: "John Doe", email: "john@example.com" },
    { name: "Sarah Smith", email: "sarah@example.com" },
    { name: "Michael Brown", email: "michael@example.com" }
  ];

  // =====
```

```
// STEP 2: Email Subject
// =====

const subject =
  "Application for Software Engineer Position";

// =====
// STEP 3: Attach PDF from Google Drive
// =====
// Example Google Drive URL:
//
// https://drive.google.com/file/d/1AbCdEfGhIjKlMnOpQr/view
//
// File ID:
// 1AbCdEfGhIjKlMnOpQr
//
// Replace YOUR_GOOGLE_DRIVE_FILE_ID with your own.

const file = DriveApp.getFileById(
  "YOUR_GOOGLE_DRIVE_FILE_ID"
);

// =====
// STEP 4: Send Emails
// =====

contacts.forEach(contact => {

  const htmlBody = `

<div style="font-family:Arial; font-size:14px; line-height:1.6;">

<p>Hi ${contact.name},</p>

<p>
I hope you're doing well.
</p>

<p>
I am reaching out regarding opportunities related to
<strong>[Job Title]</strong>.
</p>

<p>
I have <strong>[X Years]</strong> of experience in
<strong>[Industry]</strong>.
</p>

<p>
My skills include:
</p>

<ul>
```

```
<li>Skill 1</li>
<li>Skill 2</li>
<li>Skill 3</li>
<li>Skill 4</li>
<li>Skill 5</li>
</ul>
```

```
<p>
Please find my resume attached.
```

Thank you for your time and consideration.

I look forward to hearing from you.

```
<br>
```

```
<p>
```

Best Regards,

```
</p>
```

```
<strong>Your Name</strong><br>
```

Your Job Title

Email:

</a>
```

```
</div>
```

```
`;
```

```
try {
```

```
  GmailApp.sendEmail(
```

```
    contact.email,
```

```
    subject,
```

```
    "",
```

```
    {
```

```
      htmlBody: htmlBody,
```

```

        attachments: [
            file.getAs(MimeType.PDF)
        ],

        name: "Your Name"

    }

});

Logger.log("✅ Email sent to: " + contact.email);

}

catch(error){

    Logger.log(
        "❌ Failed to send email to "
        + contact.email
        + " | "
        + error.message
    );

}

// Wait 2 seconds before sending the next email
Utilities.sleep(2000);

});

Logger.log("-----");
Logger.log("Bulk Email Process Completed");
Logger.log("-----");

}

```

Step 4 – Save the Project

Press Ctrl + S and name your project (for example, 'Bulk Email Sender').

Step 5 – Upload Your PDF

Upload your resume, brochure, or other PDF to Google Drive make sure it is public. Copy the File ID from the URL and replace YOUR_GOOGLE_DRIVE_FILE_ID in Code.gs.

Step 6 – Update the Recipients

Replace the sample contacts with your own email address for testing.

Step 7 – Customize the Email

Edit the email subject and HTML body as needed.

Step 8 – Run the Script

Select the function 'sendPersonalizedEmailsWithAttachment' from the function dropdown and click Run. Approve Google's authorization requests. (select the email id you are using)

Step 9 – Automate with a Trigger (Optional)

Click the Triggers (clock) icon, select Add Trigger, choose sendPersonalizedEmailsWithAttachment, Event Source: Time-driven, Type: Week timer, Day: Monday, Time: 10:00 AM–11:00 AM, then save.

GitHub Repository

Tips

- Test the project using your own email address first.
- Do not publish personal email addresses, phone numbers, or Google Drive File IDs.
- Keep placeholder values in the public GitHub repository.
- Refer to the README.md for additional information.
